

- minor 3rd should be our limit

82 Hz + 87 Hz only 5 Hz diff. Assume they won't play 2 notes at the same time, ~~but~~ and worst case would be minor 3rd.

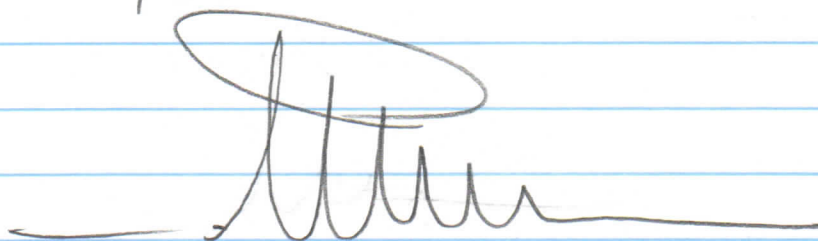

- use get/set position for plots in MATLABs

#Pos = get (figure (#), 'Position');

then use #Pos to set specific positions.

8-8/15

- Should only use First 3 harmonics

and if we did that we should only have 36 unique notes
